

Eliche a pale abbattibili Flexofold

Flexofold Folding propellers

Le eliche Flexofold a 2 pale in configurazione standard e racing combinano la minore resistenza all'avanzamento nella navigazione a vela con forme di pala ad elevata efficienza. Le eliche a 3 pale Flexofold, nell'utilizzo a motore sono tra le più efficienti. Il design delle pale garantisce un buon funzionamento anche in retromarcia assicurando rapide accelerazioni e decelerazioni richieste in manovra.

Standard and racing 2 bladed Flexofold propellers combine the most efficient blade shape with very low drag. Under engine power, 3 bladed Flexofold propellers are the most efficient 3-blade folding propellers available. The blade shape gives you better performance in both forward and reverse.
